

CC Technology assists corporate and SME clients to exploit Information Technology for improved business performance and competitive advantage.

Based in Glasgow, CC Technology is one of Scotland's most successful technology consultancies. We provide solutions to both fast-growing medium-sized businesses and FTSE100 companies, including leading public sector organisations across the UK.

Our main activities cover application development, software solutions and internet solutions. Our combined expertise provides clients with a superb creative, business and technology solution.

Background

Formed in 1988 by co-founders Dave Allan, Alasdair McNeill and Robert Milne, CC Technology has achieved consistent growth, featuring top 10 results in Deloitte and Touch Fast 50 awards, and has continued to operate profitably despite the downturn in the technology sector.

We attribute our success to the high quality of our people, our methodologies and industry specific-knowledge and experience, providing us with the ability to deliver business-led technology solutions that are based on real understanding of complex business problems.

Project highlights:

- NHS 24 rollout CC Tracker for complaints management to formalize and control the process in accordance to NHS Scotland procedures.
- CC Tracker product converted to Microsoft .NET platform for release to Financial Services provider.
- Provision of website usability and compatibility testing to Glasgow City Council in 2003-2004 prior to the re-launch of the entire city council website.
- Delivery of a knowledge management tool using internet technologies to NHS24 in 2003. This health-critical system was developed and released in a 5 week period, satisfying the customer's requirement for an aggressively scheduled project.
- Insurance policy administration system delivered to Scottish Mutual International in Dublin. Specified, developed and released within 3 month timeframe to replace existing systems.
- Design and build of a multi-instrument trading system for Abbey National Asset Managers 2000/2001. Microsoft Visual Basic front-end for real time share trading. Highly complex checks and balances. Successfully implemented and carrying out 100% of trading for £22.5 billion portfolio of equities and bonds.
- CCT carried out a 3rd party audit of all Java code for launch of Intelligent Finance in 2001.
